

Live stream information: Internet Safety

Helping our children use the internet safely has never been more important. To help parents and carers support their children to enjoy all the benefits the online world has to offer, the Lincolnshire Safeguarding Children Partnership and the Stay Safe Partnership would like to invite parents and carers to our first live stream events about online safety **on 21st January 2021**.

These two live streamed events will give you information on some of the risks that we teach children in Lincolnshire about and how you can manage their use of technology at home. The sessions will start at **12:30pm and 7:30pm** and will be available to view on the LSCP YouTube channel once they have ended.

Come and join us next week
